Tournaments and family golf events can be scheduled at Sandelie East 18 or at Sandelie West 9. If you are thinking about putting several groups together, simply call either course to check availability.

Plugging and sanding the greens at any course is an important part of turf management. We will be completing this process in the late summer months and will be thatching greens this spring. We will not plug our greens in April or May but will continue to lightly sand them all year.

Interested in establishing a handicap? You can easily sign up to do this at Sandelie or any golf course and simply post your scores at the end of your round. All courses charge a similar sign-up rate and you do not have to belong to a men's or women's group. Ask any proshop staff for more details and information.

Ground Under Repair

During the next few months, Sandelie will have a temporary green on #14. As soon as the weather is a little warmer, the 14th green will be under construction and will look a little different by the end of the summer. The green will be pushed back a little and the location of the 15th tee box will also change. During this process, we will cut a few trees to allow more light onto the green and tee which will encourage turf grass growth. Photos are posted of the current location and we will update customers on the progress of this project.
